National Bank of Abu Dhabi

- The stock traded with a weak bias in the previous session and finished at AED8.65, after making a low at AED8.60.
- Although the weekly MACD heading lower, the RSI and stochastic indicators are trading with a slight positive showing, reflecting at a bullish technical outlook in the coming week. On the daily chart as well, momentum oscillators are moving towards north, further validating the above view.
- Key technical obstacle is placed at the 200day SMA (currently trading at AED8.73), followed by the AED8.84 and daily upper Bollinger band (currently placed at the psychological AED9.00) levels. A clear break and stability above the latter might prompt bullishness in the stock.
- On the contrary, key intraday support is located at the AED8.50 level, followed by the AED8.37 and daily lower Bollinger band (currently trading at AED8.28) levels. A breach below the latter might lead to further weakness in the stock.

Gulf Finance House

- The stock posted significant gains in the last session and ended above the daily upper Bollinger band (currently placed at AED1.21) at AED1.24.
- On the daily chart, MACD and RSI are moving upwards and coupled with stochastic indicator trading near its overbought region, hints at the presence of bullish momentum in the coming session. On the weekly chart, momentum oscillators are trading with a bullish tone, further substantiating the above view.
- Crucial resistance is placed at the AED1.27/1.29 level (last touched in October 2014), followed by the AED1.32 and AED1.35 levels. A sustained break above the latter might trigger further positivity in the stock.
- However, an upper Bollinger band crossover on the daily and weekly charts indicates at potential bearish reversal in the stock. Key support is located at the AED1.18 level, followed by the AED1.15 and 20day SMA (currently trading at AED1.00) levels.

Arabtec Holding PJSC

- The stock formed a long bullish candlestick pattern on the daily chart yesterday and closed at AED1.34.
- Although the weekly MACD is pointing south, the stochastic and RSI indicators are trading with a positive tone, indicating at potential positive momentum in the near term. Moreover, on the daily chart, the MACD and RSI indicators are heading north, further confirming the above stance.
- Key technical barrier is located at the 20day SMA (currently trading at AED1.37), followed by the AED1.41 and 200day SMA (currently placed at AED1.45) levels. A break above the latter might lead to further positive momentum in the stock.
- On the bearish side, crucial support is placed at the AED1.32 level, followed by the daily lower Bollinger band (currently placed at AED1.28) and crucial AED1.25 levels. A breach below the latter might generate bearishness in the stock.

Ektitab Holding Company

- The stock traded lower in the prior session and ended at AED0.430.
- A possible centreline crossover by the weekly MACD to trade into the negative region along with RSI and stochastic trading with a bearish tone, reflects at a bearish technical scenario in the coming week. However, on the daily chart, momentum oscillators are trading with a mixed showing, suggesting at consolidation in the near term.
- Important support is placed at the 200day SMA (currently placed at AED0.420), followed by the AED0.411 and daily lower Bollinger band (currently trading at the crucial AED0.400) levels. A move back below the latter might lead to bearish pressure on the stock.
- On the positive side, near term resistance resides at the AED0.445 level, followed by the 50day SMA (currently placed at AED0.460) and 100day SMA (currently trading at AED0.470) levels.

Damac Properties Dubai Co

- The stock traded in the red for the third successive session yesterday and closed below the daily lower Bollinger band (currently placed at AED2.18) at AED2.17.
- A potential signal line crossover from above by the daily MACD coupled with the stochastic and RSI indicators pointing south, hints at the presence of bearish momentum in the coming session. Moreover, the weekly momentum oscillators are trading with a weak showing, further confirming the above view.
- Immediate support resides at the AED2.14 level, a move back below which might lead to increased selling pressure on the stock, paving way for the AED2.09/2.08 (last observed in January 2016) and AED2.05 levels.
- However, a lower Bollinger band crossover on the weekly chart indicates at potential recovery in the short term. Key resistance is placed at the AED2.20 level, followed by the 20day SMA (currently trading at AED2.22) and AED2.24 levels.

SHUAA Capital

- The stock has been trading higher since past several sessions. Yesterday, the posted moderate gains and settled above the daily upper Bollinger band (currently trading at AED1.11) at AED1.13, following a high at AED1.14.
- As clearly seen on the weekly chart, momentum oscillators are trading at a higher level above their midlines, reflecting at a bullish technical outlook. Likewise, on the daily chart, momentum oscillators are trading with a strong bias, further endorsing the above view.
- Key intraday resistance is situated at the AED1.17 level, followed by the AED1.21 and crucial AED1.25 levels. A surge above the latter might lead to further acceleration.
- However, an upper Bollinger band on the daily and weekly charts suggests that the stock might witness some correction in the near term. Important support is placed at the AED1.08/1.05 level, followed by the psychological AED1.00 and 20day SMA (currently placed at AED0.94) levels.
