UAE Indices

UAE Market Commentary

- UAE equity markets closed lower yesterday, with the Dubai Financial Market registering sharp losses after Arabtec Holding posted a more-than-expected loss in the fourth quarter.
- Financial stocks, Amlak Finance plummeted 10.0%, while Amanat Holdings and Dar Al Takaful dropped 5.0%, each. Moreover, Mashreqbank and Bank of Sharjah eased 9.3% and 4.85, respectively. Real estate sector stocks, Eshraq Properties, Union Properties and Deyaar Development declined 10.0%, 6.4% and 5.2%, respectively.
- Arabtec Holding plunged 9.8%, after reporting a net loss of AED2.95 billion in 4Q16, compared to a loss of AED403.74 million in same period last year. Energy major, Abu Dhabi National Energy Co lost 4.0%, pressured by concerns over rising US crude production. Meanwhile, Saudi Arabia reported that its January crude output was reduced by the most in more than eight years.
- The Abu Dhabi Securities Exchange (ADX) general index ended 0.1% lower at 4,563.98, while the Dubai Financial Market index closed 1.8% lower at 3,637.55.

Drake & Scull International

- Yesterday, the stock formed a long bearish candlestick pattern on the daily chart and settled below the lower Bollinger band (currently placed at AED0.500) at AED0.477.
- A negative centreline crossover by the daily MACD along with the RSI and stochastic indicators placed below their 50lines, reflects at a weak technical picture. A possible signal line crossover from above by the weekly MACD along with the RSI and stochastic heading south, further confirms the above stance.
- Key support resides at the AED0.469 level, followed by the AED0.460 and AED0.452 levels. A breach below the latter might lead to further acceleration to the downside.
- However, a daily lower Bollinger band crossover indicates at potential recovery in the stock. Important resistance is placed at the AED0.487 level, followed by the 100day SMA (currently placed at AED0.500) and AED0.515 levels.

Amanat Holdings

- Following the formation of a bearish engulfing candlestick pattern on the daily chart on 08 February, the stock has continued to decline in the previous session and ended at AED1.13, after making a low at AED1.10.
- Although the weekly MACD is heading higher, the RSI and stochastic oscillators are showing loss of upward potential, hinting at bearish momentum in the coming week. A signal line crossover by the daily MACD from above coupled with the RSI and stochastic pointing south, further affirms the above view.
- Important support is positioned at the 20day SMA (currently trading at AED1.12), followed by the AED1.08 and AED1.03 levels. A move back below the latter might trigger further downside momentum in the stock.
- Meanwhile, key short term resistance is placed at the AED1.17 level, followed by the AED1.20 and AED1.22 levels.

Takaful House

- The stock traded with a bearish tone in the last session and finished at AED1.14, after making a low at AED1.12.
- A signal line crossover by the weekly MACD from above accompanied by the stochastic indicator heading south, hints at the presence of bearish momentum in the coming week. On the daily chart, the momentum oscillators are trading below their centrelines, further validating the above stance.
- Key technical support is situated at the 50day SMA (currently placed at AED1.13), followed by the AED1.10 and daily lower Bollinger band (currently placed at AED1.08) levels. A clear breach below the latter might lead to further negative momentum in the stock.
- On the contrary, key intraday resistance is placed at the AED1.17 level, followed by the next ones at the 20day SMA (currently trading at AED1.19) and AED1.24 levels.

Gulf General Investments Company

- The stock posted significant losses in the prior session and closed below the 100day SMA (currently trading at AED0.500) at AED0.490, after making a low at AED0.486.
- With the daily MACD & RSI indicators moving lower and the stochastic oscillator trading near its overbought region, the near term technical outlook appears to be bearish. On the weekly chart as well, the momentum oscillators are trading with a negative showing, further endorsing the above view.
- Immediate support is located at the AED0.485 level, followed by the AED0.480 and AED0.468 levels. A move back below the latter might trigger further bearishness in the stock.
- However, a daily lower Bollinger band crossover suggests at possible recovery in the stock. Key resistance is placed at the AED0.500 level, followed by the AED0.510 and 50day SMA (currently trading at AED0.520) levels.

Ajman Bank

- Yesterday, the stock traded in the red and ended below the daily lower Bollinger band (currently trading at AED1.39) at AED1.37, following a low at AED1.35.
- On the weekly chart, the MACD is trading in the negative region along with the RSI and stochastic oscillators trading with a bearish bias, hints at negative momentum in the coming week. Similarly, the daily chart momentum oscillators are sharply heading downwards, further endorsing the above stance.
- Crucial intraday support aligns at the AED1.35 level, followed by the AED1.32 and AED1.29 levels. A breach below the latter might lead to further negativity in the stock.
- However, a daily lower Bollinger band crossover suggests at likely trend reversal in the stock. Immediate resistance is placed at the AED1.39 level, followed by the AED1.42 and the 50day SMA (currently trading at AED1.43) levels.

Emaar Malls PJSC

- The stock formed a long bullish candlestick pattern on the daily chart in last session to finish at AED2.61.
- On the daily chart, the MACD is moving north along with the RSI and stochastic trading above their midlines, reflecting at a bullish technical scenario. On the weekly chart, the MACD and stochastic oscillators are trading with a mild positive showing, further supporting the above stance.
- The daily upper Bollinger band (currently trading at AED2.63) is acting as a key technical resistance, a sustained break above which might lead to further acceleration to the upside, clearing way for the AED2.65 and AED2.67 levels.
- On the downside, key near term support is placed at the 20day SMA (currently trading at AED2.58), followed by the AED2.56 and AED2.53 levels. A breach below the latter might turn the main trend to bearish.
