UAE Indices

UAE Market Commentary

- UAE equity markets closed mixed yesterday, as gains in insurance sector stocks were offset by losses in banking and telecom sector stocks.
- Insurance stocks, Dubai Islamic Insurance and Reinsurance Co., Islamic Arab Insurance Co. and Takaful Emarat Insurance and Methaq Takaful Insurance Co. climbed 3.8%, 1.6%, 1.3% and 1.2%, respectively. Shuaa Capital rose 1.9%, after the company swung to a profit in the first quarter.
- On the losing side, lenders, Mashreqbank plunged 8.2% while its peers National Bank of Ras Al Khaimah, Ajman Bank and National Bank of Abu Dhabi declined 3.2%, 2.4% and 2.2%, respectively.
- Dubai Investments rose 0.5%. Meanwhile, shareholders of the company unanimously agreed to increase the cash dividend to 12% from the earlier 10% including a 5% bonus shares.
- The Abu Dhabi Securities Exchange (ADX) general index ended 0.5% lower at 4,541.04, while the Dubai Financial Market index closed 0.2% higher at 3,438.83.

Ektitab Holding Company

- The stock traded with a bullish tone in the last session and ended at AED0.490.
- With a possible signal line crossover from below by the daily MACD and the RSI & stochastic indicators pointing north, the near-term technical outlook appears to be bullish.
- Key resistance resides at the psychological AED0.500 level, followed by the 50day SMA (currently trading AED0.510) and the 100day SMA (currently placed at AED0.520). A break above the latter might lead to further strength in the stock.
- However, a possible centreline crossover from above by the weekly MACD along with the stochastic oscillator moving downwards, suggests that the upside might remain limited. Key support is located at the AED0.477 level, followed by the AED0.467 and the daily lower Bollinger band (currently trading at AED0.460). A breach below the latter might trigger bearishness in the stock.

Dubai Islamic Insurance and Reinsurance Co

- After trading lower four consecutive sessions, the stock posted significant gains in the previous session and ended at AED 0.799, following a high at AED0.808.
- Currently, the weekly MACD is heading south coupled with the stochastic indicator trading near its oversold region, indicates bearish momentum in the coming week. However, the daily momentum oscillators are trading with a positive bias, reflecting at a possible recovery in the near term.
- Important resistance is located at the AED0.818 level, followed by the 20day SMA (currently trading at AED0.830) and AED0.840 levels. A sustained break above the latter might lead to further upside momentum in the stock.
- Meanwhile, key support is placed at the AED0.790 level, followed by the AED0.775 and the daily lower Bollinger band (currently placed at AED0.760). A breach below the latter might trigger weakness in the stock.

GFH Financial Group

- Yesterday, the stock traded in the green for the second consecutive session and ended at AED2.27, after notching a high at AED2.29.
- On the weekly chart, the MACD and stochastic indicator are trading with a bearish tone, reflecting at a weak technical picture. However, a possible signal line crossover from below by the daily MACD conjoined with the northward oriented RSI and stochastic oscillators, suggests at positivity in the coming session.
- The key technical barrier is seen at the AED2.30 level, followed by the AED2.32 and the 20day SMA (currently trading at AED2.36). A clear break and stability above the latter might trigger further acceleration to the upside.
- On the other hand, important support is placed at the AED2.24 level, followed by the AED2.21 and AED2.17 levels. A breach below the latter might lead to negativity in the stock.

National Bank of Abu Dhabi

- Following two successive bullish sessions, the stock traded lower in the prior session and settled at AED10.95, after touching a low at AED10.85.
- As of now, the weekly MACD and RSI indicators are tranquil at a higher level above their midlines, hinting the presence of bullish momentum in the coming week. However, a potential signal line crossover from above by the daily MACD coupled with the RSI indicator showing loss of upward potential, indicates at a negative weak technical outlook.
- Key intraday support is situated at the 20day SMA (currently trading at AED10.85), followed by the AED10.70 and 50day SMA (currently placed at AED10.60). A breach below the latter might lead to further weakness in the stock.
- On the bright side, crucial resistance is placed at the AED11.05 level, followed by the AED11.15 and AED11.25 levels.

Drake & Scull International

- After trading bearish for three straight sessions, the stock posted modest gains in the last session and closed at AED0.449, following a high at AED 0.452.
- A recent signal line crossover by the daily MACD from below accompanied with the RSI and stochastic oscillators slightly moving upwards, suggests bullishness in the coming session.
- Key intraday resistance is positioned at the AED0.455 level, followed by the 50day SMA (currently trading at AED0.460) and AED0.470 levels. A surge above the latter might lead to further positive momentum in the stock.
- However, the weekly momentum oscillators are trading at a lower level below their centrelines, indicating that the room for downside still exists. Crucial support is seen at the AED0.442 level, followed by the AED0.435 and AED0.430 levels. A move back below the latter might trigger negativity in the stock.

Dar Al Takaful

- The stock traded with a bearish showing in the prior session and closed at AED1.20.
- Although the weekly RSI is tranquil above its 50line, the MACD and stochastic indicators are heading south, reflects the presence of negative momentum in the near term. Likewise, a negative centreline crossover by the daily MACD along with the RSI indicator placed below its midline, further supports the above view.
- Key near-term support is placed at the 100day SMA (currently trading at AED1.18), followed by AED1.17 and AED1.14 levels. A move back below the latter might lead to further bearish pressure on the stock.
- On the contrary, the key technical obstacle is placed at the AED1.25 level, followed by the AE1.27 and the 20day SMA (currently trading at AED1.29). A break above the latter might trigger bullish momentum in the stock.
