UAE Indices

UAE Market Commentary

- UAE equity markets closed lower yesterday led by losses in banking, insurance, industrial, financial and consumer staples sector stocks.
- Lenders, United Arab Bank, Sharjah Islamic Bank, National Bank of Ras Al Khaimah and First Abu Dhabi Bank declined 6.7%, 4.3%, 4.0% and 1.9%, respectively.
- Insurance companies, Takaful Emarat Insurance, Islamic Arab Insurance Co. and Dubai Islamic Insurance and Reinsurance Co. dropped 3.8%, 1.8% and 1.8%, respectively.
- Industrial stocks, Ras Al Khaimah Ceramics, Arabtec Holding and Gulf Navigation Holding dipped 2.1%, 1.5% and 0.7%, respectively.
- Financial stocks, Shuaa Capital, Amlak Finance and Gulf General Investment Co. shed 2.2%, 0.8% and 0.8%, respectively.
- Drake and Scull International lost 3.0%, after it announced that the final proceedings to secure the Securities and Commodities Authority (SCA) approval to initiate its 75% share capital reduction have commenced.
- Etisalat announced that its subscribers will be offered free WiFi during Eid, majorly in public locations across the country.
- The Abu Dhabi Securities Exchange (ADX) general index ended 0.8% lower at 4,455.73, while the Dubai Financial Market index closed 0.2% lower at 3,452.10.

Drake & Scull International

- The stock registered significant losses in the last session and finished at AED0.418, after falling as low as AED0.414.
- With the daily momentum oscillators showing loss of upward potential, the near-term technical outlook appears to be bearish.
- Key support is situated at the AED0.413 level, followed by the AED0.407 and the 20day SMA (currently trading at the psychological AED0.400) levels. A breach below the latter might lead to further bearish pressure on the stock.
- However, a possible signal line crossover from below by the weekly MACD along with the stochastic indicator pointing north, suggests that the room for upside momentum still exists. Key resistance is placed at the AED0.425 level, followed by the AED0.430 and the 100day SMA (currently trading at AED0.440). A move back above the latter might trigger positive momentum in the stock.

SHUAA Capital

- The stock declined for the fifth straight session yesterday and ended below the lower Bollinger band (currently trading at AED1.34) at AED1.32, following a low at AED1.31.
- On the daily chart, the momentum oscillators are trading with a negative tone, hinting the presence of negativity in the coming session. Additionally, a potential negative centreline crossover by the weekly MACD along with the RSI and stochastic indicators heading downwards, further validates the above stance.
- Crucial support is placed at the AED1.31 level, followed by the AED1.29 (last touched in November 2016) and AED1.27 levels. A move back below the latter might lead to further downside momentum in the stock.
- Meanwhile, intraday resistance is positioned at the AED1.34 level, followed by the AED1.36 and AED1.38 levels. A surge above the latter is required to negate further weakness in the stock.

Dubai Islamic Insurance and Reinsurance Co

- The stock traded in the red for the second successive session yesterday and settled at AED0.890, after touching a low at AED0.881.
- A signal line crossover from above by the daily MACD accompanied by the RSI and stochastic oscillators pointing south, reflects a weak technical picture. On the weekly chart, the RSI & stochastic indicators are showing slight loss of upward potential, further confirming the bearish stance.
- Key technical support is positioned at the AED0.880 level, followed by the AED0.870 and the 20day SMA (currently trading at AED0.860) levels. A breach below the latter might lead to increased selling pressure on the stock.
- On the contrary, key resistance is placed at the crucial AED0.900 level, followed by the AED0.907 and AED0.920 levels. A break above the latter might trigger upside momentum in the stock.

Ektitab Holding Company

- The stock traded with a bearish tone in the prior session and closed at AED0.447.
- Although the weekly stochastic is heading higher, the MACD and RSI oscillators are placed below their midlines, hinting at bearishness in the coming week. Moreover, a potential negative centreline crossover by the daily MACD coupled with the RSI and stochastic oscillators moving downwards, further substantiates the above view.
- Key support to be watched is seen at the AED0.444 level, followed by the 20day SMA (currently trading at AED0.440) and AED0.435 levels. A move back below the latter might lead to further acceleration to the downside.
- On the bright side, crucial resistance is placed at the 50day SMA (currently placed at AED0.450), followed by the AED0.455 and AED0.460 levels. A sustained break above the latter might trigger positivity in the stock.

Damac Properties Dubai Co

- The stock has been trading higher for past several weeks and continued to advance yesterday to finish at AED2.99.
- As clearly seen on the weekly chart, the momentum oscillators are tranquil at a higher level above their centrelines, reflecting at a bullish technical scenario. On the daily chart as well, the momentum oscillators are trading with a strong bias, further affirming the above stance.
- The key technical obstacle is located at the crucial AED3.00 level (last touched in November 2015), followed by the AED3.01 and the daily upper Bollinger band (currently placed at AED3.02) levels. A clear break and stability above the latter might lead to further bullish momentum in the stock.
- On the other hand, key support is placed at the AED2.97 level, followed AED2.95 and the 20day SMA (currently trading at AED2.93).

GFH Financial Group

- The stock posted modest losses for the second successive session yesterday and ended at AED2.18.
- As of now, the daily MACD & RSI are heading lower along with the stochastic oscillator placed in its oversold region, hints the presence of bearish momentum in the near term. On the weekly chart, the momentum oscillators are trading with a negative bias, further supporting the bearish view.
- Important support is positioned at the AED2.17 level, followed by the AED2.16 and the daily upper Bollinger band (currently placed at AED2.15) levels. A breach below the latter might trigger further negativity in the stock.
- On the flipside, immediate resistance is placed at the AED2.20 level, followed by the AED2.22 and the 20day SMA (currently trading at AED2.24) levels. A break above the latter might turn the trend to bullish.
