UAE Indices

UAE Market Commentary

- UAE equity markets closed mixed yesterday, as gains in real estate sector stocks were brushed off by losses in banking and insurance sector stocks.
- Property sector stocks, DAMAC Properties Dubai Co., Emaar Malls, Union Properties and Deyaar Development advanced 3.6%, 2.1%, 1.7% and 1.4%, respectively.
- Lenders, Abu Dhabi Commercial Bank fell 2.4%, while Union National Bank eased 1.5%.
- Emirates Telecommunications Group Co. rose 0.6%. Meanwhile, the firm announced that it has parted its way from the Nigerian market after several failed renegotiations with its lenders of a USD1.2 billion loan.
- Meanwhile, Abu Dhabi National Oil Company revealed its intentions to get into new partnership deals, while to waive off a part of its services business on local equity markets through an IPO.
- Gulf Navigation Holding stated that it is aiming a revenue growth target of 300% by 2021, on the back of its strategies to multiply business and branch out services.
- The Abu Dhabi Securities Exchange (ADX) general index ended 0.3% lower at 4,397.96, while the Dubai Financial Market index closed 0.4% higher at 3,417.94.

TABREED

- The stock has been trading sideways since past several sessions. Yesterday, the stock posted modest losses and finished at AED2.08, after making a low at AED2.07.
- Although the weekly MACD is moving higher, the RSI and stochastic oscillators are showing slight loss of upward potential, reflecting at a bearish technical picture. Likewise, a possible signal line crossover from above by the daily MACD coupled with the downward oriented RSI indicator, further validates the above view.
- Important support is situated at the AED2.06 level, followed by the 20day SMA (currently trading at AED2.03) and the crucial AED2.00 levels. A move back below the latter might trigger further negative momentum in the stock.
- On the bright side, key resistance is placed at the AED2.12 level, followed by the AED2.15 and AED2.20 levels. A surge above the latter might strengthen the stock.

Union Properties

- The stock traded firmer for the second consecutive session yesterday and closed at AED0.940, after making a high at AED0.953.
- A potential signal line crossover by the daily MACD from below conjoined with the RSI and stochastic oscillators rising higher, indicates at bullish momentum in the coming session. Moreover, the weekly momentum oscillators are trading with a slightly positive showing, further confirming the above view.
- Key short-term resistance aligns at the AED0.953 level, followed by the AED0.961 and the daily upper Bollinger band (currently placed at AED0.970) levels. A break above the latter might lead to a further acceleration to the upside.
- Conversely, key support is placed at the 100day SMA (currently placed at AED0.930), followed by the AED0.915 and 200day SMA (currently placed at AED0.900). A breach below the latter might trigger weakness in the stock.

Deyaar Development

- The stock traded with a bullish tone in the last session and closed at AED0.520.
- With a signal line crossover by the daily MACD from below and the RSI & stochastic oscillators pointing north, the near-term technical outlook appears to be bright. In addition, a potential signal line crossover by the weekly MACD from below along with the RSI and stochastic moving upwards, further affirms the above stance.
- Key intraday resistance is placed at the AED0.525 level, followed by the daily upper Bollinger band (currently trading at AED0.530) and AED0.535 levels. A break above the latter might trigger further bullishness in the stock.
- Meanwhile, intraday support is located at the AED0.513 level, followed by the AED0.506 and the daily lower Bollinger band (currently placed at AED0.500). A breach below the latter might trigger weakness in the stock.

Dubai Islamic Bank

- Following a daily lower Bollinger band crossover on 06 June, the stock registered mild gains for the second straight session yesterday and closed at AED5.62, after touching a high of AED5.65.
- Although the daily MACD is tranquil below its centreline, the RSI and stochastic indicators are attempting to move out of their oversold region, indicating a bullish technical scenario.
- Key resistance is placed at the 200day SMA (currently placed at AED5.65), followed by the AED5.68 and the 20day SMA (currently placed at AED5.71). A surge above the latter might lead to further positivity in the stock.
- However, a negative centreline crossover by the weekly MACD along with the stochastic heading south, suggests that the room for downside still exists. Key support is placed at the AED5.58 level, followed by the daily lower Bollinger band (currently placed at AED5.55).

Gulf General Investments Company

- The stock traded with a bearish tone in the previous session to settle at AED0.377, following a low of AED0.376.
- A possible signal line crossover from below by the weekly MACD along with the RSI and stochastic indicators placed below their 50lines, hints the presence of bearish momentum in the coming week. On the daily chart, the MACD and RSI are trading with a negative showing, further supporting the above stance.
- Key support to be seen is positioned at the daily lower Bollinger band (currently located at the AED0.370), followed by the AED0.364 and the AED0.358 levels. A breach below the latter might lead to further negativity in the stock.
- On the other hand, the key technical barrier is located at the 20day SMA (currently placed at AED0.380), followed by the AED0.387 and AED0.394 levels.

Dubai Islamic Insurance and Reinsurance Co

- The stock recorded mild gains in the prior session and finished at AED0.897, after moving as high as AED0.915.
- As of now, the daily momentum oscillators are trading with a bullish tone, hinting at positive momentum in the coming session. On the weekly chart, a possible signal line crossover from below by the MACD coupled with the stochastic moving higher, further confirms the above view.
- Key short-term resistance is placed at the AED0.915 level, followed by the AED0.924 and the daily upper Bollinger band (currently trading at AED0.940) levels. A break above the latter might lead to further upside momentum in the stock.
- On the flipside, crucial key support is placed at the AED0.880 level, followed by the AED0.870 and AED0.860 levels. A move back below the latter might turn the main trend to bearish.
