DAMAC Properties Dubai Co

- Following a daily upper Bollinger band crossover on 30 August, the stock retreated in the previous session to close at AED3.98, following a low at AED3.91.
- Although the weekly MACD is tranquil above its centerline, the RSI and stochastic are heading downwards, reflecting at the bearish momentum in the near term. Moreover, the daily RSI and stochastic indicators are showing loss of upward potential, further endorsing the above view.
- Key support is located at the 20day SMA (currently trading at AED3.93), followed by the AED3.87 level and the daily lower Bollinger band (currently trading at AED3.81). A breach below the latter might lead to further negativity in the stock.
- On the other hand, crucial resistance resides at the daily upper Bollinger band (currently trading at AED4.04), followed by the AED4.09 and AED4.14 levels.

Emaar Malls

- Yesterday, the stock traded in the red for the second consecutive session and closed at AED2.43.
- A potential signal line crossover from above by the daily MACD, coupled with the RSI and stochastic oscillators sharply moving downwards, hints the presence of bearish momentum in the coming session. On the weekly chart as well, the RSI and stochastic are trading with a weak bias, further affirming the above stance.
- Key intraday support is positioned at the AED2.41 level, followed by the daily lower Bollinger band (currently placed at AED2.39) and AED2.36 levels. A move back below the latter might trigger a further acceleration to the downside.
- On the bright side, key resistance is situated at the 20day SMA (currently placed at AED2.45), followed by the 50day SMA (currently placed at AED2.47) and AED2.50 levels.

Amlak Finance

- The stock traded lower for the second straight session yesterday and settled at AED1.12, after making a low at AED1.11).
- With the daily MACD attempting a signal line crossover from above and the RSI & stochastic oscillators directing towards the south, the near-term technical outlook appears to be bearish. Additionally, the weekly RSI and stochastic indicators are showing loss of upward potential, further confirming the above stance.
- Important support is observed at the 20day SMA (currently placed at AED1.11), followed by the AED1.09 and AED1.07 levels. A breach below the latter might lead to further bearish pressure on the stock.
- Meanwhile, the key technical barrier is placed at the 200day SMA (currently trading at AED1.13), followed by the AED1.14 and AED1.15 levels. A break above the latter might trigger upside momentum in the stock.

Gulf Navigation Holding

- The stock traded in the green for the third successive session yesterday and finished at AED1.32.
- As of now, the daily MACD and RSI are moving higher, along with the stochastic indicator trading near its overbought region, reflects a bullish technical scenario. Besides, the weekly RSI and stochastic are trading with a positive showing, further validating the above outlook.
- The key technical obstacle is placed at the AED1.34 level, followed by the daily upper Bollinger band (currently located at AED1.36) and AED1.39 levels. A sustained break above the latter might lead to further positivity in the stock.
- On the losing side, key support is placed at the AED1.29 level, followed by the AED1.27 and the daily lower Bollinger band (currently located at AED1.24). A move back below the latter might trigger bearishness in the stock.

Dubai Islamic Bank

- The stock recorded marginal gains in the last session and ended at AED6.12.
- A potential signal line crossover from below by the daily MACD, accompanied by the RSI and stochastic sharply pointing north, reflects the bullish momentum in the coming session. Likewise, the weekly momentum oscillators are trading at a higher level above their midlines, further substantiating the above view.
- Important resistance is seen at the AED6.14 level, followed by the daily upper Bollinger band (currently trading at AED6.16) and AED6.20 levels. A break and stability above the latter might trigger further bullish momentum in the stock.
- On the flipside, immediate support is situated at the AED6.09 level, followed by the 20day SMA (currently trading at AED6.06) and AED6.03 levels. A breach below the latter might lead to weakness in the stock.

Abu Dhabi Commercial Bank

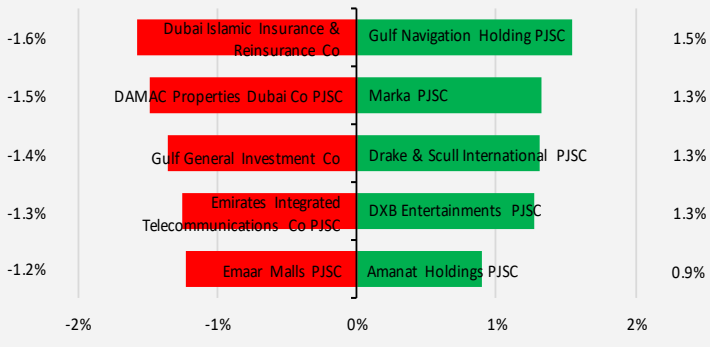

- The stock traded with a bearish tone in the previous session and closed at AED7.28, after touching a low at AED7.26.
- As clearly seen on the daily chart, the momentum oscillators are trading with a downside bias, hinting at a weak technical scenario. In addition, the weekly RSI and stochastic are trading with a negative tone, further endorsing the above stance.
- Crucial support is seen at the AED7.24 level, followed by the 50day SMA (currently trading at AED7.21) and the daily lower Bollinger band (currently trading at AED7.17). A breach below the latter might lead to further downside momentum in the stock.
- On the contrary, key resistance is placed at the 20day SMA (currently trading at AED7.32), followed by the AED7.35 and AED7.40 levels. A break above the latter might trigger strength in the stock.
